

Welcome to the Blake Trailers & Metal Fabrication website.

Established in 1970, 2025 is our 55th year in business!

Note: The Photo Gallery is unavailable due to software issues. Please call or search Boise Craigslist for a current list of trailers on the lot. We apologize for the inconvenience.

Thanks to all of our customers for letting us assist with your trailers and metal fabrication needs. Recent highlights include 26' & 30' flatbed trailer frames for tiny houses, mining trommels & trailers, construction of Idaho's World Trade Center Memorial, ranch entrances, business signage, railings and the addition of Bale Bucker Ladder Lift Systems to our list of trailer accessories. A variety of equipment including our 6' x 12' plasma table which cuts metal from paper thin to 1 1/2" thick is utilized for both trailer production and specialty projects.

Our order forms are not available on line. Please call or email to receive price & option sheets or quotes, and with any questions you have regarding our products and services.
